### Sewer Connections in Village Must Be Uniform in Size and Material

#### Council Met In Lengthy Session Monday Night — To Meet Road Committee

The matter of the sewerage installations from buildings to the property line was an item of discussion at the regular monthly meeting of Council held on Monday night. Mr. Gibson, engineer, was present and introduced the matter, stating some inquiries had been received concerning this point. He also suggested that Council, or its representative, contact the individual property owners as to where they wanted the connections located.

On motion of Councillors R. K. West and H. R. Tompkins, it was decided that five-inch vitrified tile be used for sewerage from residences to the street line and that installation be in accordance with regulations as laid down in the Provincial Plumbing and Sewerage Act. (A copy of same may be seen at the Clerk's office).

Don Williams, of Stirling Motor Sales, asked for permission to erect a sign on the Village lot west of the garage site. On motion, his request was granted.

The report of Police Chief Wm. Sutherland was presented and adopted on motion of Councillors West and Bateman. Chief Sutherland was given permission to purchase lighter shirts and trousers for summer wear.

A communication was tabled from Fire Chief Vance, of Belleville, co-ordinator of the Firemen's Mutual Aid Association, relative to a course for firemen to be held in Gravenhurst July 6th to 10th. The letter was referred to Fire Chief R. E. Fox.

Councillor H. R. Tompkins introduced the matter of the appearance of the grounds surrounding the local Post Office. Pedestrians were using the lawn as a thoroughfare and the surroundings ill became a public building. Members were in agreement and the Clerk was instructed to write the Minister of Public Works at Ottawa, asking that action be taken to resurface the lawn and fencing be erected to prevent pedestrian traffic; a copy of the letter to be sent to Lee Grills, M.P., and Senator Geo. S. White.

Members of Council will meet with the County Road Committee on May 14th, according to an announcement by Reeve K. Ray.

The Energetic Bowling League held their annual banquet on Thursday evening, April 2nd. The ladies of the L.O.B.A. served a wonderful turkey dinner which was enjoyed by the members of the League.

After the dinner, the president, Evelyn Sleeper and treasurer, Hilda Rose, presented each member of the bowling club with a trophy that had been chosen by the executive.

The individual trophies for high scoring were awarded as follows: high average for the year, Lenora West, 206; high triple, Verna Woodbeck, 705. This score was made during the last day of bowling and unfortunately Verna's name was omitted in last week's report of over 200 scores—all three games were over 200. High single, Frances Heath, 235.

After the prizes had been distributed, the new officers for next season's bowling were appointed: President, Hilda Rose; Secretary, Lulu Harlow; Treasurer, Frances Heath; Captains, Gladys Richardson, Mickey Johnston, Helen Bailey, Ollie Thompson; Press Reporter, Jane Vance.

The evening concluded with bowling at the Bowl-O-Drome. Mr. Poste kindly offered to let any one of the league bowl free of charge for the evening if they could take the head pin out with their first try. Marion Holt was the only lucky member of the league.

There were several over 200 scores during the evening: Irene Montgomery, 203; Frances Heath 212; Evelyn Sleeper, 212; Verna Woodbeck, 251; Marj. Potts, 235; Nora Wannamaker, 222; Hilda Rose, with three over 200, 215, 216, 222.

Several prizes were again distributed with Marj. Potts having high single of 235 for the 1st game; Verna Woodbeck, 251, for the 2nd game; Nora Wannamaker 222 for the 3rd game and Hilda Rose for high triple with 653. There were three prizes given for hidden scores and were won by Ollie Thompson, Lenora West and Phyllis Sheridan.

Some of the members had a game of Ten Pin bowling. Mrs. Poste and the executive served refreshments after the game. It was an enjoyable evening to conclude an enjoyable season of bowling.

### Guest of Honour At Shower

Some twenty girl friends of the bride-to-be were present.

A short programme was presented consisting of a sing-song led by Misses Ruth Morgan and Joyce Gough; readings by Misses Karen Morton and Marilyn Reid and contests.

Miss Carlisle was given a seat of honour in a decorated chair underneath festoons of confetti-filled balloons and Miss Morgan read an appropriate address. The gifts, which were arranged in a decorated basket, were presented by Misses Veva Coombes and Joyce Gough.

Donna voiced her gratitude to the hostess and friends for the beautiful gifts, after which refreshments were served and a social hour enjoyed.

## A Letter To The Editor

From the Warton Echo

FROM A HOUSEWIFE

"I wish you would get ALL of the merchants to advertise in your paper. Running from store to store trying to find what I want wastes hours of my valuable time. I wish nearly all the merchants in your town would advertise their wares, so that busy people could sit down in their leisure moments and read their advertisement

which would tell what they have for sale and where the buyers could get it.

"I have sent to mail-order houses many times for articles that afterwards I found I could have bought at home. The mail-order house puts in my home a catalogue, telling me what they have and how much it costs. I can see why it is in some communities that busy people get the mail-order habit. It doesn't always save money — but it saves time.

"Not very many people I know buy groceries from mail-order houses, because most grocery stores put an advertisement in the paper, telling the people what they have and how much it is. And I believe that, if more merchants advertised every week, there would be more people trading at home. I know it would make a difference in my case, and I believe the same is true of my neighbours' and friends."

The letter reproduced here was written to the editor of a Nebraska weekly newspaper by a housewife living in his reading area.

## LONG TERM INVESTMENT

The pulp and paper industry is spending money on forests from which a return cannot be expected for forty to eighty years hence. Nowhere else are such long term private investments being made to insure the future of Canada.

## OF MANY THINGS

(By Ambrose Hills)

### FARM CAUSE STRENGTHENED

I've just been looking at the front page of the Free Press Prairie Farmer and it gives a very gloomy impression of the outcome of the recent march to Ottawa. But is there really cause for so much gloom?

In my opinion, the time is now ripe for some real gains to be made by the agricultural community. Farmers, by their conduct on the trip and while in Ottawa, and by their personal contacts, made a wonderful impression. If their proposals had been as sound and sensible as their conduct, there is very little doubt but what they would have made some direct gains.

Governments — good ones — cannot be hijacked into unsound schemes. Mr. St. Laurent had the courage, when he was Prime Minister, to turn down the South Saskatchewan Dam project on the very eve of an election, until the project could be proven to be economically feasible. Now Mr. Diefenbaker, with equal courage, has insisted that certain questions be clarified before the government can say "yes" to prairie farmer demands. Surely plans could be devised that would meet with more general support than those brought forward so far by the farm leaders.

One requirement of any new schemes formulated would be that taxpayers are not asked to encourage farmers to produce grain which is then held for prices which can't be had. Perhaps farmers should quit trying to solve all their problems with one tool — an unrealistic price for their grain. Such a policy merely means huge surpluses and endless handling costs. It is an expensive way to solve a social problem.

There is another thing that individual farmers should watch most carefully when schemes are being devised for presentation to governments. That is, that the formulators of the schemes are really working for the benefit of the farmers, and not for some political purpose of their own. There are, in farm organizations, as in others, crusaders for causes which are not necessarily farm causes. They should not be allowed to mix their crusades. If their desire is to embarrass one government in the interest of some other party, they are not likely to come up with anything acceptable for general support. After all, the farm interest is to gain more of the national income — not to enhance some political or social theory!

Farmers have two problems; one, to sell their produce at the best possible price; two, to improve the standard of living of the farm community. It is not possible to solve both problems with the stroke of a pen — even an Ottawa pen! The farm cause is strengthened the moment that fact is faced.

## Hydro's Mobile Display To Tour Province

Reviving memories of its popular first "circuit", which jolted along back concession roads 47 years ago, Ontario Hydro has prepared to put a modern 20-ton show on the road.

Press, radio and TV representatives inspected a custom-built trailer designed by Hydro with 4,000 cubic feet of room for displays that will travel to fairs, agricultural colleges, schools and other assemblies throughout Ontario.

The demonstration coach is a descendant of two horse-drawn caravans

originated in 1912 by Sir Adam Beck, Hydro's first chairman. Known across rural Ontario as "Beck's circus", the covered wagons played a major role in showing farmers the advantages of electricity.

Today's version, displaying the benefits of modern electricity living, has design features believed unique in Canada.

About 15 people can walk comfortably through the coach at one time, but an estimated 25 more can be accommodated when the left-hand side is lowered in sections to form a platform and the telescoping roof slides out to become a canopy over it.

Displays are rearranged easily, and the Hydro-designed panel system allows them to be shown on the platform for concealed for special events.

At curbside demonstrations, visitors enter the coach on the right side and leave by the back door. Because of this arrangement, and because the trailer is the standard width despite its length of 42 feet, the show doesn't interfere with traffic.

It features three types of electric space heating, a kitchen with the latest models of large and small appliances, a water heater, electric motors, and displays of lighting and adequate wiring.

In the same compartment that houses a specially-designed electric furnace are a public address system and facilities to show movies or slides through rear-projection.

## Campbellford Man Rolls First 450 Game

Lloyd Taylor, a partner in the Taylor & Phillips Bowl-O-Drome at Campbellford, won approximately \$1,000 in cash and merchandise awards when he rolled a perfect 450 game in regular league bowling Friday night.

It was the first time in the history of the Campbellford alleys that a perfect game had been bowled.

Prizes won by Mr. Taylor include free haircuts for a year, a pound of butter a week for a year, a dozen eggs a week for a year, a camera, a side of beef, a watch, motor oil, an electric razor, a suit of clothes, a banquet for 10 people, luggage and a number of other items as well as close to \$200 in cash.

The prizes were posted by merchants in Campbellford and surrounding towns.

Work at building good driving habits, recommends the Ontario Safety League. Make sure you do the right thing at the right moment, and never make an exception, even if you "know it's safe." Never fail to give the right signal, however unnecessary it seems. One day a routine signal, given through "habit," may make the difference between a near-miss and a collision in a bolt-from-the-blue situation.

## Horticultural Society Hints

The kiss of the sun for pardon. The song of the birds for mirth. I am closer to God's heart in a garden than anywhere else on earth.

Cannas prefer a well drained soil in full sun. Their 3 to 5 feet foliage is wonderful for mass effect or interplanting. The garden bed should be deeply prepared and well enriched — well rotted barnyard manure is best. Clumps should be divided before replanting, cut or separated in such a way that each bulb or division has a live bud or eye. Plant bulbs 4 to 6 inches deep. For best results water and fertilize generously during the growing season. For continuous bloom pick the flowers as they wilt to prevent seed set.

### Dahlia

When you receive your dahlia tuber place them in moist peat to prevent them drying out before planting. If drainage is good dahlias will thrive on a wide variety of soils. A fertile medium loam suits them best.

When planting tubers directly outside wait until the soil has warmed up nicely. Have ground well prepared with the addition of bone meal or phosphate fertilizer. Plant roots about 8 inches deep, 3 feet apart. Place your root flat in the hole, eye up about 6 or 8 inches from stake, so the stalk will grow near the stake for tying. Cover the root with 2 inches or more of soil and as shoot grows, fill in the soil.

Dahlias do not require too much water in the early stages of growth. In the heat of July and August they require more. Keep well cultivated up till August 15th. After this, discontinue as the roots have a habit of coming to the surface about this time. Also keep your plants clean and healthy by spraying weekly.

When the flower buds appear it is time to feed some more fertilizer, but keep at least 6 inches from stalk.

Five stitches were required to close a wound in the head of William Mowat, a 67-year-old clothing store owner at Warkworth, who was slugged with a rolling pin Saturday by a man who fled with \$300.00.

### BEFORE AND AFTER

"Has your husband changed much since you married him?"  
"No, but he thinks he has."  
"In what way?"  
"He's always talking about the fool he used to be."

Protect our precious forests.

## Votes Against New Court House

Hastings County Council Friday voted against a recommendation to build a new county courthouse.

Detailed plans were authorized last fall after it was found renovating the old courthouse would cost more than building a new one.

Estimated cost of renovation was in excess of \$200,000. Later, low tenders for a new building indicated costs to be \$519,000.

## THE BIBLE TODAY

(By Rev. C. R. Rudd)

The continent of South America has received a stream of immigrants during the last one hundred and fifty years, which requires The British and Foreign Bible Society to supply the Scriptures in the following languages: Portuguese, German, Japanese, English, Spanish, Russian, Italian, French, Polish, Arabic, Yiddish, Greek, Hungarian, Armenian, Hebrew, Esperanto and Latin.

Many of such people are refugees, and the Bible Society assists in making them feel at home by making available the Word of God in their own tongue.

## The Good Driver

1. An open invitation to disaster is to get out of an automatic transmission car, leaving it in Drive position with engine running. Inadvertent pressure on the gas pedal, by a child or overturned parcel, can result in instant collision. Correct driving requires an immediate shift into Neutral or Park position, at every stop — including traffic lights, points out the Ontario Safety League. If you shift into neutral at every stop light, you are far less likely to leave the car in Drive, unintentionally, when you get out to open the garage door, or to buy a pack of cigarettes.

2. Disaster can strike with lightning on a three-lane highway. But, points out the Ontario Safety League, head-on crashes in the centre lane are rare. Usually the crash is caused by the driver in the centre lane allowing too much space on his right to pass the car ahead, and not noticing that he is steering slightly into the path of an oncoming car in the far left lane.

3. One of the basic rules of good car handling is, "Leave yourself an out," the Ontario Safety League reminds all drivers. Driving fast in traffic you should never feel comfortable if you do not have a stopping margin ahead and open space to one side where you could swerve away from sudden danger.

4. Many motorists who will calmly accept an hour of discomfort and delay imposed by fog, or a rainstorm, lose their tempers if they are held up for a few seconds by a wobbling cyclist. Young cyclists may constitute a hazard sometimes, but they have every legal right to use the city

streets. And they have every moral right to do so without being threatened with mutilation by impatient drivers, points out the Ontario Safety League.

5. What did you do with the time you saved by speeding on the last trip? You burned extra gas and rubber, unnecessarily. Every mile of the way you were in danger of passing a

radar set and picking up a substantial fine. You annoyed other road users. Every additional m.p.h. increased the chance of an accident, and increased the chance that any accident would result in a fatality. On the credit side of your ledger you saved, perhaps, four minutes. Was it worth it? SLOW DOWN AND LIVE! asks the Ontario Safety League.

**THE FOOD BASKET****CANNED HAM READY TO SERVE**

Convenient, thoroughly cooked canned ham is one of the many time-saving pork products finding favour with Canadian homemakers. This meat can be used in all the ways other hams are used and in most cases may be kept on the kitchen shelf for emergency use without fear of spoilage (canned hams marked "Keep Under Refrigeration" should, of course, be stored in the refrigerator).

Because the bones have been removed and fat trimmed from the meat before processing, there is no waste in canned hams. In some cases gelatin has been added to the liquid surrounding the meat. When the can is chilled before serving, as suggested on the label, the jellied mixture may then be sliced right along with the meat. If the canned ham is to be served hot, the liquid (or jelly) will give good flavour to the sauce to be served with it, for example, tomato orange sauce, raisin sauce, etc.

## CONSERVATION NEWS

### DEER SEASON

November 9th to November 21st, both days inclusive, are the dates that deer may be hunted and killed in 1959 in that part of the Tweed District comprising South Renfrew, Hastings, Lennox and Addington Counties lying north of the Queen's Highway known as No. 7. Frontenac County lying north of Highway No. 7 to the intersection of Highways No. 7 and 38, east of Highway No. 38 to Godfrey and north of County road number 8 from Godfrey to Westport.

The season for the area south of

the above line will be announced later.

### FOREST PROTECTION

During the week the ranging staff and fire wardens extinguished eight small fires in the District.

Fishermen and others will soon be using the woods in large numbers and they are asked to do their share to guard against forest fires. Before leaving a camp site, care should be taken to see that the fire is really out, this is most important as many a black looking campfire has returned to life to destroy good forests.

### FINDING ROMANCE IN TREES

Trees are the oldest living things. Some of the Redwoods of California

were of substantial size when Christ came to proclaim His gospel. Noah built his famous Ark from the Cedars of Lebanon. Christ himself was a carpenter of Nazareth. King Solomon sent 8,000 woodmen into the forest to fashion the trees for the construction of his mighty temple. The eventful voyage of Columbus and Magellan then later of our forefathers arriving on these storm-swept shores of America was made possible by wood used in ship building. So trees witness in mute splendor the changing era of our planet. While races of men rise, live out their span and pass into the ages, trees go on forever.

Nature's largest living things are trees. The Sequoias attain monstrous proportions. The General Sherman Redwood is 227 feet high and 88 feet in circumference at waist height. This famous tree was 2,000 years old when Christ was born. Standing on a pedestal in the small museum of the Norfolk Provincial Forestry Station at Saint Williams, may be seen a cross section taken from the butt of a Whitewood, or Tulip Tree recently felled on the property of John Backus, of Port Rowan, Ontario. Under magnified glass over 325 growth rings have been counted, and as each ring represents one year's growth, this local tree was 325 years of age when cut.

History informs us that the Cross on which Christ was crucified was made from a tree universally known as the Trembling Aspen, and with the slightest zephyr the leaves tremble as in horror of being associated with that immortal tragedy.

When Cercis Canadensis, or better known as the Judas Tree is in bloom, the whole tree represents a bluish-like profusion of colour; Judas blushing in shame of his dastardly betrayal.

Our Common Red Cedar is not a cedar at all, but in reality a Juniper, the wood of which is noted for its durability as a post or pole or for making moth-proof cedar chests. A Red Cedar fence post will last a life time. Many years ago this tree was referred to as TRUE HEART and enjoyed a highly dignified position among trees of other species. Some one later discovered that Juniper berries were excellent for flavouring gin and now in the minds of many, the Juniper Tree has lost a considerable degree of "face".

No chemical laboratory in the world built by man and fitted with all the wonderful appliances of science is half so marvellous as the leaf of any kind of tree. It is the food factory of the tree. The motive power is sunlight, and in the filtering process, the tree inducts through its leaves im-

mense quantities of carbonic acid gas, retaining the carbon and giving off pure oxygen so vital to human health and lives. You may perhaps wonder why the air is so fresh and pure in the forest, and why you felt so invigorated as you tramped through the sun-dappled paths in the woodland, and enjoyed contentment of mind and body not found elsewhere.

Trees provide the human race with a multitude of life's necessities. They are abundant reproducers. They are the only natural resources that are non-exhaustable.

Mr. Vardy was given \$6,500 for himself and children and \$5,800 for personal injuries.

Fire on Sunday afternoon destroyed a summer cottage on the Crowe River at Allans Mills, and caused damage estimated at about \$3,500.

The cottage is owned by G. W. Hill, of Toronto. Mr. Hill and his wife were staying at the cottage over the week-end and were cleaning up the grounds around the building.

## Why be tied to a clothesline?

A clothesline ties you down to weather-watching. But an automatic electric clothes dryer has its own "indoor sunshine." It frees you from the drudgery of lugging heavy baskets of wet wash to the line—it dries your clothes the way you want them—damp-dry for ironing, or completely dry for folding away—and it does all this automatically for less than five cents! There's a treat in store for you the first time, and every time, you use an automatic electric clothes dryer.

## FORD 1959

SO BEAUTIFULLY RIGHT  
IN EVERY WAY

This is the car that makes such beautiful sense for 1959 — because it's designed to meet every kind of driving need today. And that is exactly what it does. Beautifully.

This new Ford has a clean, crisp look — trim and tough — fast on its feet. And it's a big car. But there isn't an ounce of waste fat on it. You don't need a can opener to pry it out of your garage. And it'll fit very neatly between two parking meters. But it's plenty big inside. There's room enough for the whole family to travel clean across Canada with all the ease and comfort that only a big car is able to give you. All the facts point to Ford in '59... and so does the fun!

## NEWS FOR THE BUSY FARMER

### SHOW RING VS. MILKING ABILITY

Is a good show ring dairy cow necessarily a good milker?

That question has been banded around a lot in the last few years by both breeders and commercial dairymen. Some farmers claim it's unsafe to buy a cow nowadays unless you can look up her or the dam's milking records; others believe type can still be used as the main yardstick in buying replacement cows. Here's some more grist for the mill.

A type-production study on 9,489 cows made by the Holstein-Friesian Association proves there is a good relationship between type and milk and butter fat production, says the O.A.C. Dairy Department. The table below shows it:

Type Rating	Mature Equivalent Milk (lbs.)	Fat (lbs.)
Excellent	17,710	650
Very Good	13,955	527
Good Plus	12,524	468
Good	11,722	437
Fair	11,176	416
Poor	11,533	430

The most frequent defective characters noted in Holstein-Friesian cows were high pelvis, sickled legs, toeing out of rear feet, and low thurls.

The O.A.C. also reports that a study of 1,547 Guernsey cows showed that heavy shoulders (30% of cows), high pelvis (25%), low thurls (22%), sickled legs (30%), and short front udders (30%) are the most frequent undesirable characters. Weak fore attachment of the udder, close teats and low pins were present in 16 to 20 per cent of the cows inspected.

### MIXTURES DON'T OUTYIELD PURE STANDS

Since Ontario was first settled, farmers have argued the pros and cons of mixed versus pure stands of barley and oats.

Growers in favor of mixtures maintain that mixed stands of barley and oats outyield pure stands, and save mixing costs for feed. Farmers who seed pure stands believe that they yield just as well as mixtures, and they like the pinpoint accuracy of a single crop; they say they can fertilize, harvest, and feed better because they're dealing with a specific crop.

What do Ontario's plant breeders say?

"For the last three years we've been comparing mixtures to pure stands of oats and barley, and allowing for seasonal variations, have found no difference between either in yield," says Dr. Ernest Reinbergs, O.A.C. barley expert in charge of the testing. Dr. Reinbergs suggests growing pure stands of oats and barley, no mixtures.

"All our fertilizers, yield, variety, and feeding recommendations are based on pure stands," he states. "It's nearly impossible, for instance, to make up a feeding program if you don't know what percentage of your mixture is oats or barley when you're calculating such factors as protein percentages. Similarly, our varietal

recommendations are based on the reaction of a crop in a pure stand. Perhaps a variety acts differently when it is seeded in mixtures."

Dr. Reinbergs brings out some other interesting points:

Farmers might run into harvest losses because of the difference in maturity between barley and oats.

Since there are no mixture recommendations, farmers do not know which mixture varieties or ratios will give them the best yield.

Other tests have shown that varieties and mixtures react differently to fertilizers.

The proportions of oats and barley especially are affected and would seriously affect farmers who use mixture seed from last year's harvest for this year's seeding.

### THREE DISEASES THAT CAN KILL LAMBS

Lambing problems don't stop after the middle of April. Even after lambs are a month old and have escaped from diarrhea and navel-ill, there are other vicious lamb-killers to look for. These three reminders of the Ontario Veterinary College make sense.

Joint-ill, which occurs when docking or castration wounds become infected can kill a lamb within a week. The infection enters through the wound and is carried to the joints and other organs. First a high temperature shows up, then the leg joints swell, and the lamb becomes stiff and refuses to suck. Those animals that live through this often have chronic lameness and seldom show a profit. Treatment and prevention are simple. Keep the yard or pen clean, and dress the docking and castration wounds with antiseptics such as tincture of iodine or 10 per cent blue stone solution.

Enterotoxemia or overeating disease occurs in both suckling and feedlot lambs. A bacteria causes the disease. If the disease occurs in suckling lambs move the ewe to a poorer pasture to cut down the milk supply. If it's a flock sucking problem, the lambs should be inoculated with the right bacterin.

Coccidiosis sometimes shows up in lambs over a month old. Affected lambs show severe scours that may be blood tinged. Sanitation in sheds at lambing time would have helped

prevent it. If the problem looks serious, call in a veterinarian.

### MILK DISTRIBUTORS DISCUSS NEW METHODS AT K.A.S. MEETING

Approximately 125 representatives from dairies in Eastern Ontario took part in a one-day conference at the Dairy Division of K.A.S. recently. New methods of grading and handling were described with special emphasis being given to bulk cooling and transporting milk. E. M. Biggs, who spoke at the evening session, stated that the Ontario Department of Agriculture had been asked to assume greater responsibilities in supervising milk production in many parts of the province. He also outlined some of the plans being considered for the pooling of milk in Ontario and how a price pool might operate in a particular market.

Other speakers included Dr. C. K. Johns, Dairy Technology Research Institute, Ottawa, Prof. F. W. Hamilton, O.A.C., Guelph, A. M. Barr, M. E. Beach and O. R. Irvine, of K.A.S. Participating in a panel discussion on bulk handling were C. Mongeon and Dr. J. E. Sterns, of Ottawa, C. A. Lowry, Smiths Falls and Aubrey Moodie of Richmond. The use of tanks resulted in better quality milk the panelists agreed, but ascertaining weights presented special problems. Thanks for arranging the meeting were extended to the K.A.S. staff by Ronald Clark of Ottawa and Orval Sinclair of Toronto, on behalf of the Ontario Milk Distributors' Association.

### SURVEY SHOWS HOG PRODUCERS LIKE "ASSEMBLY YARDS"

"Hog producers love 'em!"

This is the way Charles W. McInnis, president of the Ontario Hog Producers' Co-operative, described the reaction of farmers on how they like the Co-operative's present assembly yards for marshalling hogs for sale.

The Co-operative is the selling agency for hogs in 42 Counties of Ontario. It assembles the hogs at 16 yards located strategically in producing areas in Ontario and then through telephone and teletype communication with the central selling office in Toronto disposes of them to packing houses.

"Farmers who live within 20 miles or so of the various hog assembly yards in Ontario simply 'love them'," says Mr. McInnis. "They have given them freedom from dependence upon truckers and also convenience and ease of marketing their produce."

"Recently contacts with farmers has clearly indicated to us that farmers want more assembly yards and that they want them run in the same way they are today," said Mr. McInnis.

### ROSES

It is natural that Canadian gardeners should be influenced in selection of rose varieties by the great bulk of advertising in American periodicals. Every garden magazine one picks up sings the praises of roses patented in the United States; White Knight, Pink Lustre, Peace, Perfecta, Golden Masterpiece.

All of these are worthy hybrid teas just as Fuseleer Spartan and Gold Cup are worthy florabundas but a good many of them originated in Eur-

White Knight started in Europe as Message, Peace was originated in France as Mme Meiland, Perfecta was originated by Korde in Germany as was Gall Borden.

These Europeans were patented in the United States because they stood up so well under American conditions. There are other European varieties that have stood up well under Ottawa conditions that should be more widely used in Canadian gardens.

Confidence, originated by F. Meiland, won the Bagatille gold medal in 1951 and is a favourite of Warren Oliver, Horticulturist with the Canada Department of Agriculture, as a large flowered fragrant pink.

Dr. Debat, also bred by F. Meiland, is a large fragrant fully double deep pink to coral that won the National Rose Society gold medal in 1950.

Mme Dieubonne, another F. Meiland origination is a fully double, long pointed bud. The color is vermillion with gold reflex. Growth is vigorous and bloom profuse.

Altesse is a vigorous free flowering rose with double globular strawberry red flowers.

Magali, originated by C. Malleri, of France, is a vigorous upright free flowering bush, with medium sized cochineal flowers.

Tzigane has quite large cupped yellow and red flowers in profusion. The plant is upright and bushy with leathery foliage.

All these have been outstanding and better suited to our climate than many of the American introductions.

## Electric Home Heating Gets Support

Electric heating will rapidly become a popular means of achieving more heating comfort in the home. This was the conclusion of a Conference sponsored by Ontario Hydro which brought together all branches of the electrical industry in Ontario.

Manufacturers, distributors, contractors and power suppliers agreed unanimously at a conference on Wednesday, April 22nd that an industry-wide organization is needed to keep pace with the rapid development of electric home heating.

A committee, representing all branches of Ontario's electrical heating industry, is planning an industry-wide organization to ensure high standards of performance and workmanship, and to make electric home heating generally available to the public.

This Planning Committee will recommend specific responsibilities for each branch of the industry, as well as methods of co-ordinating activities. The committee will include two representatives each, from On-

tario Hydro, the Association of Municipal Electrical Utilities, Canadian Electrical Manufacturers Association, Electrical Contractors Association, Canadian Electrical Distributors Association and Insulation Manufacturers. The Conference demonstrated the unanimous support of the entire industry for a program of development of electric home heating in Ontario.

## Seaway Bus Tours Ontario Innovation

Bus tours complete with spiclers will leave Cornwall's Bus Depot daily this summer on tours of the St. Lawrence Seaway and Power Project areas. Highlights of the tours will be:

Ontario Hydro-Electric Power Commission Information Bureau and Powerhouse, to view short film of the history and construction of the gigantic power project and creation of new North American lake, including tour of 3,000-foot long dam, equivalent of sixteen-story office building in height and station generating 820,000 horsepower of electricity.

Trip over Long Sault Parkway, a causeway linking several islands, being developed as public parks with public beaches, picnic and camping areas, marinas and lookouts.

New town of Ingleside, composed of people moved at Government expense from now inundated sites of Wales, Dickinson's Landing, Farran's Point and Aultsville.

Crysler Memorial Park project that will include Upper Canada Village — to which many Loyalist and other old homes, churches, inns and other structures of historic value, including pioneer furnishings and home and farm equipment, are being moved to create a "museum piece".

Excellent bus connections can be made for this tour from most U.S. and Canadian cities. For detailed information write Ontario Department of Travel and Publicity, Parliament Buildings, Toronto, Ontario, Canada.

### NEW CANADIAN AIR SERVICE

One of Canadian Pacific Airlines' new 400 m.p.h. Britannia aircraft streaks across the above layout as it will through the skies of Canada on May 1th when CPA's new daily cross-Canada service links Montreal, Toronto, Winnipeg and Vancouver.

Cutting one hour, 25 minutes from existing commercial airline flying time between Vancouver and Montreal, CPA will become the first Canadian airline to provide tourist accommodation in a jet-prop plane. Upper left, Capt. Jim McGuire explains to

passenger the "Eye in the Sky" radar unit installed to detect weather disturbances ahead of the airliner so that the rough air may be avoided.

Upper right, stewards and stewardesses from Germany, China, Holland, France and Japan who operate on CPA's international routes fanning out from each end of the new cross-Canada service.

Lower left, meals on tables and continental cuisine will be features of both tourist and first class service

when operations commence.

Lower right, pilots learn how to fly the Britannia in a flight simulator, exact replica of the plane's flight deck. The operator, seated behind the pilots, flicks switches to create every type of in-flight situation which a pilot might encounter. At bottom, route map indicates mileages and eastbound flying times between cities to be served by CPA, and also shows international connections at each end of new route.

DON'T SOW WEED SEEDS

Maybe it's sounding a new note to suggest that killing or controlling weeds can be unprofitable. Nevertheless, the time has arrived when we can no longer afford to kill weeds just for the satisfaction of it. We must control them for a specific desirable result, and, in the main, that result must be bigger and better crops, says the Fields Crop Branch of the Ontario Department of Agriculture. Otherwise, the weed control becomes an unprofitable expense.

The main reason weeds cause reduced crop returns is the competition they give the crop for space, sunlight, moisture, and plant nutrients. The effect of this competition is greatest when crop plants are small. In the crop of wheat, oats, and barley, competition occurs when the crop plants are in the four-to-six leaf stage. Therefore, to be most profitable, weed populations should be eliminated at that time. In the case of corn, the damage caused by weeds is most pronounced at tasselling stage.

This illustrates particularly the importance of eliminating weeds before they've done the damage to the crop they're sharing the field with. Primarily, control starts with weed-free seed. Weed-free seed is basic to clean farming, and without it all other forms of weed control are wholly inadequate. Weed seeds planted with the crop on a well-prepared, well-fertilized seed bed germinate in the instalment plan — some this year, some next year — so that no matter what post-seeding treatment is followed, this one misdeed will haunt the careless sower for many years.

### W. Elmer Sandercock Unanimous P.C. Choice In Hastings West

Large and Enthusiastic  
Crowd At Convention Held  
In Stirling Monday Night

Progressive Conservatives of Hastings West gave their unanimous support to W. Elmer Sandercock as their standard bearer in the provincial election scheduled for June 11th next. There was a large and enthusiastic crowd, estimated at over four hundred, in the Stirling Theatre on Monday night and Mr. Sandercock was the only nominee.

Dr. R. T. Potter, of Belleville, presided over the meeting and Claude Graham, of Trenton, acted as Secretary. The guest speaker was Hon. Kelso Roberts, Attorney-General for the Province of Ontario.

#### E. Sandercock

Mr. Sandercock was given a rousing round of applause when he rose to acknowledge his acclamation. He paid tribute to the executives of the various Progressive Conservative organizations, Councils, School Boards, Ladies' P.C. organizations in Belleville and Trenton and the County Council for full co-operation throughout the years he had been their representative in the Legislature. Through the efforts of all, stated Mr. Sandercock, we have had a full share of government grants for various projects. Twenty-five new schools had been erected throughout the riding through the co-operation of the Department of Education during his tenure of office. Numerous roads and highways have either been built, rebuilt, or paved with 401 being the greatest expenditure in this activity. The development of mining in this area, which initially resulted with the Bethlehem Steel operation, was due to the efforts of the Frost government. In this connection Mr. Sandercock referred to Arthur Shore, a former resident of Stirling, who discovered Faraday mine.

In closing he pledged his best in the interests of the electors of Hastings West.

#### Attorney General Roberts Speaker

Introduced by Robert Pringle, of Belleville, Hon. Kelso Roberts, Attorney-General, paid tribute to Mr. Sandercock as a fine representative of his riding and one well worthy of the tribute paid him. A native of Belleville, Mr. Roberts spoke of his forebears and the splendid representatives the Conservative party had had in this area. His grandfather had been a resident of Stirling, stated Mr. Roberts, who gave figures to show the contribution the Frost Government had made to this riding in 1953. Municipal aid, which continues to be a forte of the present government amounted to \$3,841,251 for the County of Hastings and \$739,230 more allotted to the city of Belleville.

In commenting on the progress of the Progressive Conservative governments since Mr. Drew's sweeping victory in 1944, Mr. Roberts stated that for every day the government has been in power there has been one new school, or substantial addition built. Mention was also made on the success of the province-wide highway safety drive and emphasis was placed on taking care at the wheel to keep down the "killer unaware".

A harsh refutation of the opposition parties' condemnation and criticisms was made. The Liberals were accused of "woolly thinking" and he asked for the CCF to explain on what grounds they accused the Frost government of being arrogant, when the highest degree of co-operation existed between it and the municipalities, the press, and the people of Ontario at all levels. "We have a record to maintain as the premier province of Canada and as long as the people continue to put their faith in the Frost government, we will continue to do so," concluded the Attorney General.

#### Area Candidates Speak

Mr. Roberts was thanked by Norris Whitney, candidate for Prince Edward-Lennox, for a "speech which spoke for itself".

### Stirling-Rawdon High School Variety Show

On Friday, May 22nd at 8.00 p.m. promptly, the curtain of the Stirling Theatre will rise on the Stirling-Rawdon District High School's production of a Musical Melange entitled "The Passing Years," wherein the trend of popular songs, dances and skits from the Minuet of the long ago to the Cha Cha of today will be tunefully and gracefully traced.

The second part of the programme will consist of a one-act uproarious farce, "The Life Of The Party;" in this there is never a dull moment. This play will be followed by an item of singing suitably called "These You Have Loved," which features solos, harmony and unison singing in some of the greatest favourites of all time, including "Smoke Gets In Your Eyes" and the rousing chorus, "Oklahoma." The singing group consists of twenty odd of the best male and female teenage voices in the district; you will enjoy hearing them. The choreography is in the capable hands of Barbara Woodbeck, and her group of dancers are busy perfecting every movement. At the piano will be Miss Ruth Mumby. The chief parts in the farce are being played by Paul Bridges, Louise Harding, Gail Jeffs, Eddie Mayhew and Mildred Morton. Members of the staff are engaged in this project in one way or another; the production as a whole is by Mr. E. C. Hay-Ellis.

Clark Rollins, candidate for Hastings East, and Keith Brown, Conservative standard bearer for the Peterborough riding, also spoke to present.

They would like Council to buy the land and give it to the Recreation Commission and Rotary Club to develop for a playground for the young children. They also suggested that if Council sold the lot on Church St. to the High School Area Board it might receive sufficient to pay for the proposed park property.

On motion of Councillors West and Bateman, Council agreed to sell the lot on Church St. to the School Area at a price to be agreed upon.

(By Rev. A. Packman)

The service at St. Paul's as at Carmel will be conducted by Rev. C. R. Rudd, B.A., B.D., representing the Bible Society. Our friends are asked to join with other churches in the evening at St. Andrew's at 7.30.

Many beautiful flowers graced St. Paul's on Sunday last. Especially lovely were those the gift of Mr. and Mrs. W. L. Anderson. It was most kind of them to think of St. Paul's, whose people share very deeply their grief in the loss of Lorne.

St. Paul's Sunday School Anniversary is to be held on Sunday, May 24th. On the following two days, the Festival of Sacred Praise will again be held in the Church.

On Sunday, May 31st, we are to have the pleasure of having Stirling Lodge of the Masonic Order at St. Paul's.

## Cooke -- Woods Nuptials

Mauve, white and yellow 'mums, interspersed with ferns, formed a pretty setting in Tabernacle United Church, Belleville, on Saturday, April 11th, at 12.30 noon, when the Rev. H. H. Hillis, of Belleville, united in marriage Susan Gwendolyn Woods, of Belleville, daughter of Mrs. Alfred B. Woods, of Belleville, and the late Mr. Woods, to George William Cooke, of Burwash, Ontario, son of Mr. and Mrs. Howard C. Cooke, of Stirling, Ont.

Mrs. L. Miller, church organist, presided at the console of the organ and accompanied the soloist, Mrs. E. Webber, who sang before the ceremony, "Because," and during the signing of the register, "O Promise Me."

The bride, who was given in marriage by her brother, Mr. Gordon B. Wood, was charming in an original gown of finely etched Venetian lace, featuring a fitted bodice with portrait neckline and long, molded sleeves. The full, beautifully scalloped skirt was worn in promenade length. She wore a matching headress and shoulder veil and carried a bouquet of yellow roses.

Miss Marilyn Hodgen, of Belleville, was maid of honour, and Miss Lois Cooke, of Stirling, sister of the bridegroom, was bridesmaid. Both wore gowns of similar design in cotton length, the former in mauve point de spir, with matching cummerbund in taffeta, and headress and gloves. Both carried nosegays of yellow roses surrounded by yellow, white and mauve 'mums.

Mr. Gerald Cooke, of Toronto, brother of the bridegroom, was groomsmen, while Mr. Ronald Henry, of Marmora, and Mr. Wayne Woods, of Belleville, nephew of the bride, ushered the guests.

The reception was held in the church parlor where the bride's table was prettily appointed with white damask and centred by an all-white three-tier wedding cake topped by a tiny bride and bridegroom beneath an arch of white flowers, and misted about the base with white tulie. Yellow bands, which crossed the table, yellow candles and the bridal bouquets added a nuptial accent.

The bride's mother received wearing a deep rose gown trimmed with lace, navy accessories and corsage of blue tinted 'mums, assisted by the bridegroom's mother, who wore a gown of beige and brown printed silk with beige accessories, brown shoes and bag and corsage of bronze 'mums.

For the wedding trip, the bride chose a matching jacket, black and white accessories, and corsage of pink roses. Mr. and Mrs. Cooke are residing in Sudbury at 218 Spruce St. Guests attended from Toronto, Stirling, Ottawa, Marmora, Madoc, Kingston and Belleville.

## Horticultural Society Hints

Even though chrysanthemums they are not perennial in the sense that you can leave them alone in one place indefinitely. They will perform much better for you if you will lift and di-

vide the clumps every spring as soon as the new shoots are 3 or 4 inches tall.

Choose a cloudy day to do the work. Take one clump at a time. Reach under it with a spading fork and lift the whole clump out. In order to see what you are doing in dividing the clump, it is necessary to remove the soil. The quickest and easiest way to do this is to dip the whole clump in a tub of water. When the soil has come off, lift the clump onto a working surface and cut off the most vigorous, healthy shoots, most of which will be found at the outer edge. Discard the old woody centre of plant. Wrap the ones you want to keep individually in wet newspaper, group them by varieties and name, set aside till all lifting is finished and you are ready to start planting.

You may be surprised to see how few roots these shoots have. The root is more like a long underground stem, with just a few little roots sparsely scattered along it. But never fear, this will grow lustily.

Plant as soon as possible after dividing not closer than a foot and a half. Water with a liquid plant food. Shade them for a few days. Don't neglect to pinch out the tops of the plants as they grow along to make them many branched. Keep well watered all summer as they are shallow rooted. By autumn you will have huge plants which will become mounds of bloom.

## Wallace - Watt Nuptials

Innisfail United Church, Alberta, was the scene of an attractive afternoon wedding on April 14, when Miss Anita Louise Watt, only daughter of Mrs. Watt and the late Mr. Bruce Watt of Pine Lake, became the bride of Mr. Allan John Wallace, eldest son of Mr. and Mrs. John W. Wallace, of Stirling, Ontario.

Mixed spring bouquets decorated the church for the ceremony which was performed by Rev. R. G. Kilgour. For her wedding, the bride chose a ballerina length gown of white cotton lace over taffeta styled on princess lines with three-quarter length sleeves and matching cummerbund. She carried a bouquet of red roses and her only jewellery was a double string of pearls a gift from the groom and small pearl earrings.

The bride was attended by Miss Audrey D. Warke, who chose a sleeveless, ballerina length gown of beige chiffon with gold stripes for the occasion. She wore a small beige bandeau hat and beige gloves and

carried a bouquet of pink roses. Mr. Mark Purvis, of Edmonton, was best man and Mr. Robert Meyers was usher. The wedding music was played by Mrs. D. Ure.

Following the ceremony, a reception for thirty guests was held at the home of the bride's uncle, where Mr. Charles Warke proposed the toast to the bride.

Mr. and Mrs. Wallace will spend their honeymoon in Ontario and of their return will reside in Calgary.

## Shannonville Cow Makes Record

An exceptionally large Record of Performance Test has been completed by Belle R. A. Posch, a member of the purebred Holstein herd of J. E. Walsh & Son, Shannonville. Starting on test as a 6-year-old, Belle produced, in 305 days on twice-a-day milking, a total of 21,338 pounds of milk containing 719 pounds fat. This record has a Breed Class Average percentage of 179 for milk and 165 for fat.

Belle has been classified "Very Good," the second highest rating obtainable for body conformation. She is a daughter of Lifloc Supreme Anchor, who was Reserve Grand Champion Bull at the Peterborough Black and White Day in 1947.

## THE BIBLE TODAY

(By Rev. C. R. Rudd)

"Before I could read, I was no better than a bench," said a woman in an Egyptian village. "Now I can sing, and I can read the words in my Bible, so I know the stories the Minister tells in his sermons. I am part of this service, I am a person."

The increase in literacy throughout the world challenges the people of the more literate countries to help to supply books worth reading. Books are so precious to the new literates that the woman quoted above keeps her Bible in the breadbox so that it will never rot away.

## THE FOOD BASKET

### QUICK HOT MEALS USING CANNED HAM

Canned ham is probably served cold more frequently than hot. However these suggestions are given for the homemaker who prefers to serve a hot meat:—

(1) Broil ½-inch slices of ham with slices of leftover boiled potatoes or patties made from leftover mashed potatoes and halves of hothouse tomatoes brushed with butter and sprinkled with crumbs. Serve with canned corn, heated. (2) Pour maple syrup over ½-inch slices of ham to glaze in the oven, at the same time heating frozen French fried potatoes. Make a cream sauce using a combination of milk and part of the liquid from canned peas; add the drained peas

and reheat. Serve ham, potatoes with sliced hot house cucumbers. (3) Heat sliced ham in one frying pan and pan-fry thinly sliced new potatoes and sliced green onions with butter in another. Serve with quick cooking frozen green beans and a spring salad, for example, lettuce or young spinach and radishes, celery and asparagus, tossed together lightly with French or Italian dressing. (4) Use diced canned ham in place of ham-burg to make a quick supper chili. Brown sliced onion as usual, add the meat, salt, pepper, tomato juice and canned kidney beans. Cover and simmer slowly about 30 minutes to blend flavours. Serve with coleslaw or lettuce and salad dressing. (5) Add chopped or ground ham to omelet or scrambled egg mixture and cook. At the same time, cook tender green asparagus and open a can of tomatoes to be served either hot or cold in a side dish.

# HOW TO LIVE WELL

CANADA'S manufacturing industry began to grow significantly about 80 years ago when the people decided that more of their needs should be provided from Canadian factories.

Today manufacturing is the most important element in the Canadian economy. It provides nearly half of all employment; it pays high taxes; and it is the greatest contributor to our national production.

Manufacturing will continue to provide Canadians with the world's second highest standard of living if the people of Canada will buy Canadian.

**THE STEEL COMPANY OF CANADA LIMITED**  
MONTREAL CANAMIQUE HAMILTON BRANTFORD TORONTO

This is the car that makes such beautiful sense for 1959 — because it's designed to meet every kind of driving need today. And that is exactly what it does. Beautifully.

This new Ford has a clean, crisp look — trim and tough — fast on its feet. And it's a big car. But there isn't an ounce of waste fat on it. You don't need a can opener to pry it out of your garage. And it'll fit very neatly between two parking meters. But it's plenty big inside. There's room enough for the whole family to travel clean across Canada with all the ease and comfort that only a big car is able to give you. All the facts point to Ford in '59 ... and so does the fun!

## NEWS FOR THE BUSY FARMER

### WHAT D.H.I.A. HAS MEANT IN PRINCE EDWARD AND HASTINGS COUNTIES

Good management meant over \$1,000 more for some farmers' pockets in the Counties of Prince Edward and Hastings.

From a net loss of \$802 per herd in 1953 to a net gain of \$492 per herd in 1958, sums up results for dairy farmers of Prince Edward and Hastings Counties who affiliated with the D.H.I.A. (Dairy Herd Improvement Association) and practised its recommendations during that period. Reflected in terms of returns per hour of labour, these figures mean an increase from 32c to \$1.14.

Between 1953 and 1958, production per cow rose from 7,324 pounds to 8,870 pounds. A change in pounds of concentrate fed per cow equivalent from 945 to 1,239 resulted in a decrease in the pounds of milk per pound of concentrate fed from 7.8 to 7.2. Man hours dropped from 133 in 1953 to 89 in 1958, meaning that the man hours per 100 pounds of milk decreased from 1.8 to 1.0.

For every \$100 investment, these farmers were selling 12 cwt. of milk in 1953 and sold 15 cwt. in 1958. At the same time, farmers of Prince Edward and Hastings Counties decreased the average cows in their herds from 19 to 18. The average price received per hundredweight rose from \$2.86 to \$3.04 during this period, while the cost per 100 pounds of milk declined from \$3.47 to \$2.72.

With very small increases in prices for milk, while labor and feed costs increased substantially, those farmers who had an opportunity to join the Dairy Herd Improvement Association and made good use of the information supplied, increased their net profits materially. This was accomplished by radical change in management and a definite effort to improve methods wherever possible. That they are making good use of the information received through the Dairy Herd Improvement Association from the Farm Economics and Statistics Branch of the Ontario Department of Agriculture is clearly evident.

### SENATE CONCERNED OVER SMALL FARMER

Serious study should be given to improving the lot of the small farmer, Dr. Mel Andral, economist with the Canada Department of Agriculture, said in a paper delivered to the Senate Land Use Committee recently.

Dr. Andral said about one-third of Canada's 575,015 farms were uneconomic units housing approximately one-third of the nation's farm population of 2,746,765.

#### Census Definition

The census definition of a small farm on which Dr. Andral based his statement is one that is too small to provide the operator and his family with what is considered an acceptable standard of living. According to the census, a holding of one to three acres and an agricultural production of \$250 a year is a farm, although it could not be so regarded in the ordinary sense.

The situation was somewhat confused by the presence of a large number of these tiny farms owned by retired couples, part-time farmers or hobby farmers whose farms were small by choice. Many of them received non-farm income which was not included under farm income and therefore served to make the average income of farmers across Canada appear lower than it actually was.

#### Other Categories

Outside of these categories there was still a very large number of farms which failed to provide their owners with an acceptable standard of living — some 55,000 Prairie province farms of less than 130 acres and some 187,000 farms elsewhere of less than 70 acres of improved land.

The reasons were often lack of capital to expand in area or to buy new equipment, inability to transfer to more suitable land or to a more profitable occupation, or simply failure to apply proper farm techniques.

The fact that there would always be small farms, or at least relatively small farms should not deter an investigation to help improve the lot of this large proportion of Canadian nationals. Possibly this could be done by greater application and use of the services and facilities already provided by federal and provincial governments and universities — scientific information, credit and extension training.

#### Specific Studies

Dr. Andral suggested studies in specific areas: an appraisal of the units and the potential of the area; an attempt to help farmers make the adjustments necessary; and to help launch younger members of the family into vocational training. Rehabilitation or re-location might be part of the programme.

Dr. Andral referred to the Rural De-

velopment Programme in the United States which is attempting to aid small and low-income farmers. The programme is provided by the federal government and managed by state, country and local committees comprising people from farm, school and church groups, service clubs, business and industrial personnel. The committee helps families who want to stay in farming to acquire the tools, land and information that they need; increases the range of off-farm opportunities and sees that they arm themselves with good training and good health.

The programme recognizes that the community can provide a better basis for aiding the low-income farmer than the agricultural sector alone can do.

### YELLOW ROCKET CONTINUES TO SPREAD

Yellow Rocket, a primary noxious weed, continues to spread in Ontario despite efforts to control it, states the Field Crops Branch of the Ontario Department of Agriculture.

Sometimes called Winter Cress, Yellow Rocket is often mistaken for Wild Mustard. However, it is easy to distinguish between them. Yellow Rocket usually flowers in the middle of May and Wild Mustard three weeks later. Yellow Rocket has a number of main roots, while Wild Mustard has a single tap root. Yellow Rocket is a smooth plant with shiny lobed leaves; Mustard is quite hairy with sharply margined, dull-colored leaves.

The use of high-grade seed is one way of preventing new infestations; for example, not one seed of Yellow Rocket may be present in No. 1 Gradq clover seed. Single plants of Yellow Rocket should be pulled and burned. Plants in pastures should be mowed when flowers appear. Fields that are polluted with this weed should be mowed when flowers appear. Fields that are polluted with this weed should be cut early for grass silage whenever possible. Seeds that ripen will be destroyed by fermentation in the silo. Good drainage and thorough spring and fall cultivation will help kill Yellow Rocket.

Yellow Rocket may be controlled in mature stands of alfalfa by applying 6 ounces of M.C.P. amine acid in 50 gallons of water per acre after the tops of the alfalfa have been killed by fall frosts. Daytime temperatures should be above 45 degs. F. when spray is applied. The alfalfa tops are usually dormant, and the daytime temperature right, during the last week in October or first week in November.

It takes time and effort to eradicate Yellow Rocket, but there is a great deal of satisfaction in seeing a clean field.

Canadian wood consumption is below annual forest growth.

### BUCKWHEAT

Buckwheat has gradually taken a back seat to most other crops in Canada over the last 30 years.

Production has declined from a half-million acre crop of approximately 10 million bushels in 1928, to 100,000 acres in 1958 with a yield of slightly over two million bushels.

The decline has been gradual as indicated by the 1937 acreage of 396,000 and 186,000 acreage of 1948.

Dr. W. G. McGregor of the Canada Department of Agriculture in Ottawa gives some reasons for this decline. They are: the reduction in demand due to a lower consumption of starchy foods; a declining taste for buckwheat cakes; improved farm equipment which permits quicker planting of other crops hence less need for a quick maturing crop like buckwheat; and one other important item, a drop in the price per bushel.

In defense of buckwheat, Dr. McGregor says we may be overlooking an opportunity to exploit its use in the human diet and in rations for livestock, especially with over-production in some cereals. Buckwheat, he says, is one of the best sources of protein of high biological value for supplementing other cereals. Because it is high in lysine, it could become an excellent substitute for part of the corn or other grain in a feed mixture.

Further, Dr. McGregor points out, that buckwheat is the best crop to grow on unproductive land. It matures quickly and is ideal for low lying areas which in some seasons cannot be used until it is too late for ordinary cereals. Buckwheat is also used as a smother crop to crowd out weeds, as a cover crop in orchards and vineyards, and as a green manure crop. The flowers provide an excellent source of honey with a distinctive flavor. An acre has enough nectar for as much as 150 pounds of honey in a season.

### TEST CORN AS FEED FOR BACON HOGS

More and more Ontario farmers are feeding corn to pigs. They like it as a source of cheap, easily digestible energy. But corn has one big shortcoming: When overfed, it produces a fatty carcass.

Farmers who self-feed corn and concentrate, run into this problem constantly. A pig slows down in growth after reaching 110 pounds, and tends to put extra energy into fat instead of meat.

Animal Husbandry experts at the Ontario Agricultural College are working on this problem. They are carrying out tests to find out what levels of corn should be fed at the different hog weights. The researchers also are trying to find out how much protein should be fed with corn and what level of low-energy oats is needed to cut down the "strength" of

### PROFESSIONALS BEWARE

The majority of people find photography a bewildering science and never quite grasp the mechanics of what is actually a very simple business. Irvine Brace and Jan Campbell, seen here examining their newly developed film, are out to tell the truth about 'photography' in CBC radio's new programme CBC Camera

Club — a 15-minute feature heard every other Saturday morning on the Trans-Canada network. They will give lessons on taking better pictures, developing films and making good prints at home. Irvine Brace is known in Toronto for his newspaper column on photography.

### corn.

In one experiment, two ratios of corn to oats were fed to growing pigs, and three ratios of corn to oats were fed to hogs from 125 pounds to market weight. Pigs were also divided into two groups according to their level of protein. The higher protein level was 17% protein to pigs up to 75 pounds; 15% protein from 75 to 125 pounds; and 13% protein to hogs between 125 and 200 pounds. The lower protein level was 14% to 75 pounds; 12% from 75 to 125 pounds; and 10% from 125 to 200 pounds. Here are the results:

Pigs on high protein gained 1/10 pound faster — 1.62 pounds per day compared to 1.52 pounds per day — than pigs on low protein. The high-protein pigs also cost less to feed and produced better carcasses than pigs on low protein feeding. The corn oat

ratio studies showed "there was some benefit from including high levels of corn in the rations of pigs up to 125 pounds." The experiments are continuing.

#### HOW MUCH?

"Look here," said Robinson, "I've come to see you about that dog of yours. It's bitten my mother-in-law three times."

"Well, I'm sorry," said the dog owner, "but I'm not prepared to do anything—"

"Oh, I don't want damages," said Robinson. "I've come to see how much you want for the dog."

Official figures show that Canadians, during the early part of 1959 were paying off their debts to installment finance companies faster than they were taking on new borrowing.

### May Meeting Stirling W.I.

The May meeting of the Stirling W.I. was held at the home of Mrs. Earl Luery on Thursday afternoon.

Mrs. Blanche Reid, the president, occupied the chair and conducted the business part of the meeting. The Ode and the prayer opened the meeting. Roll call, "Plant exchange or pay a fine" was well responded to. Three memberships were paid for the new year.

Mrs. B. Bateman sent a message of appreciation for fruit received while ill and also for the kind words of comfort in their sudden bereavement. The members are so pleased that Mrs. Bateman is much better in health and was missed at the meeting.

The short course was reported by the secretary, Mrs. D. Montgomery. The members decided on food and nutrition for their course. The pleasure trip was again discussed with the president contacting Mr. S. McDonald, Agricultural Rep., as to the most interesting places to visit on this trip.

Mrs. B. Reid was appointed as the voting delegate to the District Annual on May 28th, with the River Valley W.I. as hostess.

Generous donations were voted to be given to the following: Musical Festival of Sacred Praise for prizes; Boy Scouts and Horticultural Society, the latter two for beautification.

The June meeting will be held at the home of Mrs. Duncan Montgomery. Roll call, "Name a township in Hastings county". Mrs. C. West will convene the programme. Time of the meeting will be announced later under the Crest.

Mrs. P. Bronson was chairlady for the program. Opening with the singing of "Home on the Range", Mrs. E. Luery acted as pianist in the absence of Mrs. R. Williams, who is attending the Women's Institute Conference in Guelph; she was accompanied by Mrs. Bartindale of Pine Grove. A reading, "Spring Cleaning", was given by Mrs. Earl Luery. In part, there are hundreds of little things that willing hands might do. Don't forget the human brain gets dull and dusty, we need to make our mental houses airy and

### STIRLING HORTICULTURAL SOCIETY

The May meeting of the Stirling Horticultural Society will be held at the home of Mrs. Harold West, Tuesday, May 19th at 8.00 o'clock. A 10c plant sale will be held. Mr. Sidney McDonald will be the guest speaker and will show slides. Lunch will be served.

sweet and new. We need to turn old ideas, old grudges, old woes, fling wide the windows and admit the sun's refreshing love to light the secret places, that are dark with hate and fear. Let love into your home and life and these evils will disappear. The aim of religion is not to get us into Heaven but to get Heaven into us.

Horticultural Society President, Mrs. P. Bronson, gave a talk on the care of plants and flowers, soil ingredients; also the germinating of seeds and of plants by special methods. Several plants and seeds were displayed using this method of growing, showing the world in horticulture is advancing at a great length. Several of these plants were given the ladies to take home and pot.

A Mother's Day paper was read by Mrs. Luery. The Bible is the greatest book or ever will be published by man, telling the stories of miracles and creations of healing and compassion, all intermingled with the greatest of love of Jesus sacrificing His life for us. How much in comparison is a good mother's life as that to Jesus' life. Mothers love is not in vain — true she gets weary many a time doing good to others; but it seems this was in God's plan of a mother's role. Remember, fame is only a passing gesture, it fades and disappears with time; but good work and worthy deeds live on and on. That helping hand in sickness or sadness, a good mother must be lived. Mothers exercise these good things and you will find the greatest happiness and thanksgiving of gratitude to God for including you as a mother on Mother's Day.

A name and number contest was conducted with Mrs. Ketcheson, Mrs. M. Aryhart and Mrs. P. Bronson tying and each received a lovely hand crocheted tray cloth for their efforts. This interesting afternoon meeting closed with the singing of the Quenee and the Mizpah Benediction.

A dainty lunch was served and all lingered awhile for a visit. The greatest of friendship and sociability is shown at these gatherings. Mrs. W. C. West voiced appreciation on behalf of the members for all the enjoyment they received from this meeting.

### 4-H Club Members Visit Parliament Buildings at Ottawa

On Thursday, May 7th, the 1958 winners of the Ottawa Bus Trip visited our National capital city. This was the first year in which the trip was taken in the month of May; it has always been customary to go during the winter. The pleasant weather and colorful lawns and gardens made for some fine photography throughout the day.

The trip is an annual event made available to the high member in each 4-H agricultural club, and to each 4-H homemaking club member receiving county honours.

Mr. Lee Grills, M.P. for South Hastings planned a most interesting day. The group visited the mint and the war museum as well as many parts of the Parliament Buildings. After having dinner with Mr. Grills in the main parliamentary dining hall they witnessed, many for the first time, parliament in session.

To round out the day, the two buses journeyed down the driveway along the canal. Beds and beds of Netherland tulips along with other spring flowers were just in the very early stages of bloom. Stopping for a few minutes at the Ottawa Experimental farm everyone had a look at the dairy and beef barns horticultural and field crops plots.

Clinton Nesbitt, Assistant Agricultural Representative and Mrs. Marilyn Sauve, Home Economist for Hastings County arranged the trip and accompanied the group on it.

A. Danford, Springbrook, Ontario.

The church was a picture of Springtime beauty with pedestals and baskets of blush pink gladioli and baby's blue chrysanthemums, flanked by silver candelabra and white lighted tapers. The guest pews were designated with white satin bows. The pastor Rev. W. G. Fletcher, B.A., officiated.

Mrs. Craig Watson, Harold, Ontario, cousin of the bride, provided traditional organ wedding music and accompanied the soloist, Mrs. Margaret McMullen, who sang "The Lord's Prayer" before the ceremony and "O Promise Me" during the signing of the register.

The winsome bride, given in marriage by her father, wore an ankle-length gown of nylon net over rayon taffeta. A long apron effect of Chantilly lace covered the front of the bouffant skirt. The bodice was a fitted basque with a deep peplum of embroidered lace across the back of the skirt, set with seed pearls and sequins. The portrait neckline and long lily-point sleeves were also embroidered. The full skirt fell in rows of tiered net over a crinoline and a row of tiny buttons from waist to neckline gave a chic effect. Stone quarry owner rates Chevrolet the toughest truck going

## "Put a Chevy out there and it stays!"

At the Snyder Stone Quarry, you see Chevrolet trucks of all ages. "They get better and better every year," Mr. R. G. Snyder says. "My '59's keep going with no downtime at all for major service . . . moving more material at less cost per mile than any other make of truck I've had". The grades are steep from quarry to crushing mill, the loads are big and punishing. That's why Mr. Snyder specifies Chevrolet. "Put a Chevy out there and it stays," he says.

"You never do wear one out. You just get tired of looking at it and get a new one".

The truck you see up above is taking on a mountain of a payload—yet Mr. Snyder states, "It moves over the road like a light truck".

That kind of performance is a specialty of the house. Chevrolet turns out heavy-duty trucks that keep their poise no matter what you put in them. They're beating the big, oversized rigs at their own game, showing that precision-engineered chassis components and super-efficient V8 power make up for a locomotive-looking build any day of the week.

Today you sure can't assume that because a truck is trim-lined and good looking it doesn't work every bit as hard as

those old-styled steam rollers. Put a Chevy on your run and see what a little pure efficiency can do. Your Chevrolet dealer will arrange the details.

Cuts gas costs by 20% on multi-stop schedule!

This bakery firm is sold on Chevrolet's "easy driving and fuel economy". Their Chevies keep at it 10 hours a day, averaging 78 stops, covering about 3,500 miles a month!

No job's too tough for a Chevrolet truck!

## 10 Years of Progress

with  
**Premier FROST**

These last ten years, beyond all comparison, have witnessed the greatest development in the history of our province. In these ten years, Ontario's advances in the development of resources, business expansion and human betterment have been unsurpassed anywhere.

The dynamic economic creed of the Government of Premier Leslie Frost has been—and continues to be—MORE PEOPLE, MORE INDUSTRY, MORE JOBS, MORE WAGES, MORE OPPORTUNITY, and from these MORE PRODUCTIVITY AND REVENUE TO DO THE JOB.

Great as Ontario's progress has been, under wise and sound Progressive Conservative policies, even greater progress lies ahead.

### RURAL ELECTRIFICATION

90% of Ontario's farmers now have power. Provincial grants totalling \$100 million have increased rural power customers from 220,000 to 473,000 in ten years.

### AGRICULTURE

Farm cash income in Ontario reached an all-time high last year. Great strides forward have been made in the orderly marketing of farm products. Price supports are a reality.

### HUMAN BETTERMENT

Ontario's advances in health, education and welfare are unequalled. Investment in human betterment has risen from \$104 million to \$329 million a year—about half of Ontario's total revenues. Personal income has risen much faster than living cost.

### HIGHWAYS

In ten years, Ontario's investment in our vast provincial highway system has risen from \$65 million to \$238 million a year. Road grants for the improvement of municipal roads are up from \$15 million to \$61 million a year.

### MUNICIPAL AID

P-C Government policies have lightened the burden on every municipal taxpayer. Provincial aid has increased from \$82 million to \$310 million annually in ten years.

### HOUSING

Vigorous government action has abated the acute housing shortage. In 10 years, 425,000 new dwelling units have been completed, a record without equal on this continent. 1958 saw an all-time high of 64,000 completions.

competition in Peterborough on July 19th.

An executive meeting will be held on May 20th to prepare the rest of the meetings and activities for this year. Two girls have been chosen to try out in the Dairy Princess Competition.

Plans are now being made for a dance in December at Stirling. The committee for this is composed of Helen Hart, Barbara Mallory, Roger Firkin and Ralph Deilor.

After the business section of the meeting was completed something a little different took place. The girls

had all brought their lunches in prettily decorated boxes. These were auctioned off by the treasurer, Carl Richards, thus turning the meeting into a box social. The auctioning completed, everyone enjoyed recreation and dancing to bring another successful meeting to a close.

## Horticultural Society Hints

### WHAT TO PLANT IN SHADE

True, if a flower garden has to be in the shade, it will never be the riot of colour that a sunny garden may be. Nevertheless, many beautiful and delicate flowers will grow in shady locations.

Shade itself is perhaps not the greatest drawback to healthy growth of flowers. Shade often means trees and trees mean millions of hungry, thirsty roots exploring the garden soil. Flowers, shrubs, or grass have tough competition for the soils store. Special beds may be protected from encroaching tree roots by barriers placed 18 inches in the soil. These may be of sheet metal, aluminum, or heavy roofing paper. Fertility and moisture can be maintained much easier within such barriers than where tree roots are free to roam.

Only a few annuals will do well in the shade. Coleus, sempervivens begonias (wax). These are often used for bedding — they make a neat and colorful edging. Schizanthus, cornflower, lobelia—these must be replaced each year.

For permanent plantings use perennials. The selection is wider in this group — Daylilies, Aquilegia or Columbine, plaitain lilies, Lily of the Valley, astilbe, violets, violas, bleeding-heart, Coral Belle.

Holidaying — Plastic vegetable bag wrapped around a pot plant will keep the soil moist for two weeks. Water plants just before you leave, and plastic will keep moisture in. Fasten with plant tie or rubber band.

## Quinte Conference Held May 26-29

Discussions were held and several letters were read and discussed. The list of resolutions from head office proved very interesting, but only half were dealt with and the rest laid over until the next meeting. With the provincial election falling on the next regular meeting, the meeting will be held on the evening of Wednesday, June 10th.

One new family membership was added. Two members were reported in Belleville Hospital, Mrs. Kenneth Thompson and Mr. Everett Bulton.

Following adjournment of the meeting lunch was served and a social time enjoyed.

## Anglican Y.P. Spring Conference

Many Young People of the Anglican Church gathered at Stirling, Frankford and Glenn Miller for the annual Spring Conference, of the Diocese of Ontario.

The theme speaker for the two-day conference was Rev. L. Hawkes, of Tweed. He spoke on the four-sided development of Christian life. "Young people in University tend to tear things apart", he said, "and try to streamline it, but when they do get out of school they are paralyzed. They become flying buttresses — supporting the church on the outside and then flying away." Why? This question and many others were ably answered by Rev. Hawkes.

Luncheon was held at Frankford, and the Hon. President, The Rt. Rev. K. C. Evans, Lord Bishop of Ontario, spoke on the ministry for both boys and girls. A synopsis was given of

the seven men to be ordained at St. George Cathedral in Kingston.

Election of officers for 1959 was held under President Mavis Coombes, of Stirling.

Elected were: Chaplain, Rev. D. Chateau, Cardinal; President, Dale Payne, Kingston; 1st Vice-President, Don Wood, Cardinal; 2nd Vice-President, Dave Fraser, Brockville; Treasurer, Sandra Newman, Belleville; Secretary, Joyce Glenn, Belleville.

A debate, "In order to make the A.Y.P.A. programme effective, it should be completely re-vamped", was carried out by two teams made up from Cardinal, Brockville and Belleville.

Guest speaker at the evening dinner was Mr. Edgar Charles Hay-Elms. While in India, he joined an expedition to the Himalayan Mountains, and on writing a thesis on this account was elected a Fellow of the Royal Geographical Society of Great Britain. Mr. Hay-Elms is head of the English Department of Stirling High School.

## THE BIBLE TODAY

(By Rev. C. R. Rudd)

The most recent translation of the original Hebrew and Greek of the Bible into English is progressing in England under the leadership of Professor C. H. Dodd, Chairman of the Joint Committee on the translation of the Bible. Dr. Dodd has said that three or four years were still needed before the new Testament would be on sale and at least eight or nine years before the whole Bible would be available. This indicates the deep research and scholarship being brought to bear so that the accuracy and integrity of the translation will be assured.

Premier Leslie Frost  
in his Report to the People of Ontario  
4th May, 1959.

On June 11, the people of Ontario will exercise their democratic right to chart the future course of our province.

Before them will be the record of achievement of a decade of wise policies and sound management under the government of Premier Leslie Frost. . . ten years in which Ontario's advances in the development of resources, business expansion and human betterment on all fronts have been unprecedented in Canada or anywhere in the world.

Under Progressive Conservative administration, the stage has been set for even greater progress in the years ahead. The Premier has announced far-reaching and far-sighted plans for government action to continue and increase this dynamic development which has become the envy of the entire world.

The election issue is therefore simple and straightforward. The accomplishments of the past have been tremendous, but *even greater progress lies ahead*. It can and will be achieved only under these same wise policies and with the same skilled and steady hand at the helm of the ship of state.

### Rotary Foundation Fellowship Available To Local Students

A year of study abroad as a Rotary Foundation Fellow is the exciting possibility for some student from Stirling. Carl Bateman, President of the Rotary Club, of Stirling, has announced. Applications are now being accepted by the Rotary Club for the fellowship, which includes all transportation education and living expenses for the 1960-61 academic year.

**Fellowship Qualifications**  
Applications for the Rotary Fellowship may be made only by students whose permanent residence is in the Stirling area and should be made to Mr. Harold Baker, Stirling. Candidates must be single and between 20 and 29 years of age. They must have

a college or university degree (or they must now be in their junior year), a record of high scholastic standing, and a thorough knowledge of the language of the country in which they propose to study. They must have the ability to make friends easily, be vitally interested in world affairs, and possess an instinct for leadership. Rotary Fellowships are granted without regard to race, creed or nationality.

#### District Competition

The applicant selected by the Rotary Club of Stirling will compete for the Rotary Fellowship with applicants selected by the other clubs in this District, which is comprised of 23 Rotary Clubs in District 701. Deadline for the receipt of applications by the local Rotary Club is August 1st. \$3,000,000. in Grants

Since the program was inaugurated in 1947 in memory of the founder of Rotary, Rotary Foundation Fellowships have been awarded to 1,202 young men and women in 67 countries for study in 44 countries. The one year grants average \$2,600 each and the total grants have been in excess of \$3,000,000.

#### Unique Opportunity

Rotary Foundation Fellowships are unique in that with some 10,100 Rotary Clubs in more than 100 countries throughout the world, the student is in direct contact with Rotarians and their families during his year away from home, no matter where he is studying. He attends their Rotary meetings, visits in their homes and places of business, and travels as much as possible during his school holidays. In this way, he sees at first hand how the people in his host country live and, through close associations, he lays the essential foundations for increased international understanding which is one of Rotary's main objectives.

#### Tomorrow's Leaders

Many Rotary Fellowship alumni already have shown promise of being among tomorrow's leaders: they are teaching in universities and secondary schools — they have entered the foreign and domestic services of their governments — they have been ordained as ministers of churches of various faiths — they are doing advanced research work — and they are active in positions of leadership in many different business and professional fields.

A smile is only good when it is given away.

Mrs. Fargy had the topic on "Prayer," which was very interesting and helpful. Prayer is living and working with God. Prayer should be part of our spiritual diet. We should pray in earnest with no hard feelings in our hearts.

A monologue, "A Mom Can Make A Difference," was given by Mrs. Earl Fox. Miss Gena Spry led in prayer. The closing hymn was "Who is on the Lord's Side" and all repeated the benediction.

## Presented With Shower

A shower was held on Wednesday evening, May 4th, in honour of Miss Lola McConnell, at the home of her aunt, Mr. and Mrs. Donald Rose, 322 Charles Street, Belleville, Ont. Co-hostesses for the evening were Miss

Judith Rose and Miss Marilyn Reid. About twenty girl friends and relatives of the bride's were in attendance. The rooms were beautifully decorated with bells, streamers, and balloons for the occasion.

After the guests had signed their names on an apron, the programme began with singing, with Miss Grace Heasman at the piano. A humorous

reading was given by Miss Judith Rose, followed by a contest in which Miss Marion Broadworth won the prize. The guests were then asked to guess the number of beans in a jar, and the prize was won by the guest of honour.

An address was read by Miss Marilyn Reid on behalf of those present, and Misses Judith Rose and Marion Broadworth presented the bride with a beautifully decorated hamper of gifts. After opening the gifts, Lola graciously extended her thanks and "For She's A Jolly Good Fellow" was sung.

At lunch time, Mrs. Edith Gay received a prize for having the lucky cup and saucer. A dainty lunch was served by the hostesses, and a social hour enjoyed.

## THE FOOD BASKET

CRISP SPRING VEGETABLES  
BRING CRUNCH AND COLOUR  
TO LUNCH BOXES

Along about now, those of your family who tote a noon day lunch in box or bag are, no doubt, tiring of the good old standby sandwiches — chopped, sliced cheese or meat, fish and peanut butter.

"There's not a thing wrong with these sandwiches", you might say — and you are right! At least one of the protein foods mentioned should be included in the daily lunch.

Still, it is time something new was

added and what's newer right now than the fresh crisp vegetables springing up all over the country! These lunch box menus from Canada's Kitchen should give you food for thought — and action!

## Monday

White bread sandwiches of Sunday's roast pork with a little applesauce spread on for moistness.

Crisp lettuce, wrapped separately, for adding to the sandwich at noon.

2 or 3 green onions or crunchy radishes.

## Tuesday

Sandwiches made from brown bread spread with a generous layer of soft cheese and several layers of thin slices of cucumber.

Some raisins and nuts for nibbling.

## Wednesday

Ham-on-rye sandwiches. Try canned ham for a change and spread on a little mustard for zip.

Lettuce and thick tomato slices, wrapped separately, for adding to the sandwich later.

Shelled hard cooked egg, wrapped snugly in foil or waxed paper, with a tiny package of salt.

## Thursday

Brown bread sandwiches of peanut butter mixed with chopped cooked bacon at breakfast time plus a little fruit marmalade.

Crisp celery and cucumber sticks, 2 or 3 of each.

## Friday

Chicken (or tuna fish) salad sandwiches. Mix the canned or cooked fresh chicken (or tuna) with chopped green onion and celery and moisten with salad dressing.

Whole tomato quartered lengthwise but not separated, wrapped in foil or waxed paper.

## OF MANY THINGS

(By Ambrose Hillis)

## TEENAGE PUZZLE

On the street where I live there are three very beautiful teenage girls, and I have known them for quite a few years. The other day I agreed to take them for a drive to see a sports event. I drove. They talked. And I was puzzled.

These three beauties were short of dates. Not one had a steady boy friend. Yet wherever we went, I saw young lads, bug-eyed, glancing at us, wondering, I have no doubt, how this middle-aged codger had found himself such beauties.

What was the matter? I could not figure it out.

During the game, they cheered loudly. They knew the young players, and they pointed out their heroes to me, but when the play came close to us I never heard them shout the names. I began, "Attaboy, Dick!" I yelled, when Sue's hero was near us. He glanced up, saw me, saw the girls. He flushed a little, but dug in and

played like a demented whirlwind for the balance of the game.

When the game ended, I tried to shepherd the girls to a point where they could applaud their winning heroes in person as they came off the ice. But no sir. These self-sufficient, sophisticated young gals were as shy as any story-book country maiden (real country maidens aren't as shy as writers would have us believe.)

We had a soft drink and chips at a nearby restaurant after the game. Pretty soon a few of the young lads drifted in. My girls acted as if they were completely disinterested. They took on that glassy-eyed, don't-give-a-darn expression.

No wonder they don't have dates! They scare the boys away.

So, driving home, I delivered a lecture to these neighbourhood beauties. "When you want something in this world," I said, "you are wise to let the world know about it. And that includes boy friends. You acted as if you thought those lads had leprosy, while an hour before you were telling me they were dreamboats. Get wise. There's no law against a come-on smile, you know."

I think it registered. I know it did. Because the next day, one of the girls phoned one of the boys and congratulated him on their win. And the boys were having a party that night at one of their homes to celebrate, so the girls got invited, and they had a wonderful time.

## The Good Driver

Taps are for turning off . . . especially on busy highways!

Taps on the brake pedal give warning flashes to the cars behind. Coupled with turn indicators and/or hand signals they give unmistakable indication of intention to slow down and turn off the highway.

There is nothing in the law to require a motorist to give this additional warning. It is just a matter of common sense and self-protection. And it is also something else that is very important . . . it is a matter of courtesy.

A driver should make his turn off a busy highway with all reasonable speed. A leisurely turn can back up the line of traffic unnecessarily. But firm braking at the last moment may invite a rear-end collision if the car behind has not noticed, or has not believed the turn signal. That is why warning flashes of the stop light, operated by light taps on the brake pedal, are always worth while when high speed traffic is following close behind.

Such signals are public evidence of a man who is driving well. A driver who is thinking ahead, thinking behind and thinking to the side. A driver who wants to keep out of trouble himself, and wants to help the man behind to do the same.

## KNOW THESE NEW TRAFFIC LAWS

Effective — Monday, May 25th

- 1 You must lower your headlights:
  - (1) when within 500 feet of an approaching motor vehicle; and
  - (2) when following another motor vehicle within 200 feet.
- 2 It is an offence to place signs on the windows and to hang objects in the motor vehicle which obstruct the driver's view.
- 3 It is an offence to load a truck or trailer in such a way that any part of the load falls on the highway during transit and the penalty for such offence has been increased up to a maximum fine of \$200 and in addition the licence or permit may be suspended.
- 4 Passing on the right is now permitted in cities, towns and villages including Metropolitan Toronto but only:
  - (1) when overtaking a motor vehicle making or signalling a left hand turn;
  - (2) on streets having two or more lanes in each direction; and
  - (3) on one-way streets.

# CHEVY GIVES YOU 7 BIG BESTS!

Take it, not from us, but from the published opinions of outside, independent experts and from on-the-record facts and figures: Chevrolet gives you these 7 big bests over any other car in its field!

## BEST BRAKES

In direct competitive tests of repeated stops from highway speeds, conducted by NASCAR\*, Chevy was rated best in its class—and why not? Chevy brakes are larger for up to 66% longer lining life.

\*National Association for Stock Car Advancement and Research.

## BEST STYLE

As summed up in POPULAR SCIENCE MAGAZINE: "The fact is, in its price class the Chevy establishes a new high in daring styling . . . It's the car that's unmistakably '59 in every modern line."

## BEST ENGINE

Every motor magazine has given Chevy's V8's unstinted praise. As SPORTS CAR ILLUSTRATED puts it: "Indeed, this device is surely the most wonderfully responsive engine available today at any price."

## BEST TRADE-IN

Chevrolet's quality Fisher Body construction, smooth, more economical engines, rugged transmissions and sleek modern design hold resale value higher than others in its field . . . bring you more money at trade-in time.

## BEST ECONOMY

No doubt about this: two Chevrolet Sixes won their class in the famous Mobilgas Economy Run, got the best mileage of any full-size car.

## BEST ROOM

Official figures on all car dimensions make this clear. For example, Chevy front seat hiproom is unsurpassed . . . almost six inches wider than one of its competitors.

## BEST RIDE

You'll be able to tell this yourself, instantly. But MOTOR TREND magazine expresses it this way: ". . . the smoothest, most quiet, softest riding car in its price class."

## PLUS THESE TREMENDOUS TRIFLES

Who'd want to do without Chevrolet's extra luxuries? Like the protection of full wraparound bumpers, crank-operated ventipanes, the convenience of single-key locking, a real overhead curved windshield, oil-hushed hydraulic valve lifters in every standard engine for quieter running, a bigger luggage compartment with full side-wall lining.

No wonder more people are buying Chevrolets than any other car!

Brown, were conducted on a tour of woods operations in the northern part of the County by members of the Tweed District Department of Lands and Forests staff. Also in attendance were the three Hastings County Tree Commissioners and an interested lumberman from the area. The purpose of the trip was to undertake a field inspection of certain logging operations which had been recently criticized at County Council meetings as being in contravention of

the Hastings County Bylaw respecting the cutting of trees in the County.

The tour afforded the group an opportunity to obtain first-hand information on questions which had been in their minds for some time. As a re-

sult of the trip, there was a general feeling that the operations were being conducted satisfactorily and did not contravene the County Bylaw which was the principal concern of all parties.
